M16000 Multi Arcade

Congratulations on purchasing the M16000 Multi Arcade, the best quality Multi Arcade on the market today. This manual will explain everything you need to know about your new M16000 Multi Arcade, and what it does not explain you will have fun exploring and discovering on your own!

Your M16000 is built to last for years of fun, has many features not available in any other Multi Arcades and is for home use only. It is coinless and should not be converted to accept coins or for gambling purposes. The manufacturer of the M16000 is not liable for damages to the unit or legal ramifications in the event that this unit is used for other than intended purposes.

To avoid serious harm to your machine:

DO NOT unplug your machine while it is on.
DO NOT plug any device to this unit that is connected to the internet.
DO NOT alter monitor setting or any settings on the unit.

INDEX

M16000 can be fully customized including:

Vinyl images
LED button colors
Speakers
…and MORE.

CARE & MAINTENANCE

Do not set liquids on machine. Any liquids will cause irreversible damage.

Clean vinyl sides with windex and cotton rag, or a damp cotton rag.

The monitor is protected by the outside glass and is surrounded with material that will keep dust off the actual monitor, so you will not need to clean the monitor itself. To clean the glass use a microfiber cloth to avoid scratches. DO NOT soak screen with cleaner or water, which may run down between the screen and the monitor and cause damage.
